FOR IMMEDIATE RELEASE

Esketamine (Spravato™), an FDA-Approved, Fast Acting Antidepressant That May Improve Treatment Resistant Depression in Hours Instead of Weeks, Available in the DC Metro Area

Chevy Chase, MD – Esketamine (Spravato™) an FDA-approved, fast acting antidepressant that may improve treatment-resistant depression in hours instead of weeks is now available in the DC Metro area. SPRAVATO™ is delivered intra nasal via nasal spray, with no IV injection required for medication delivery.

Esketamine (Spravato™) is available only through a limited distribution program that is part of the SPRAVATO™ REMS (Risk Evaluation and Mitigation Strategy). Washington Behavioral Medicine Associates, LLC is one of the select, few certified clinics to offer this new treatment option.
